

Anti-Bribery Policy

As a company, we are committed to conducting business which is free of bribery and corruption.

The aim of our Anti Bribery policy is to ensure that all those working for our organization are able to recognize bribery and corruption issues and know their responsibilities in preventing such behaviour.

Examples of potential bribery

A third party requires a commission prior to signing a contract to do business.

A third party offers a disproportionately lavish gift.

A third party requires payment to be made in cash or refuses to provide an invoice.

A third party asks for payment to overlook a legal requirement.

Individual Responsibility

We expect individuals to prevent any acts of bribery or corruption and if they detect such acts to report them. It is the responsibility of all those working with us to comply with this procedure.
