

WEEE Compliance Statement

Background

The European Union's Waste Electrical and Electronic Equipment (WEEE) Directive 2012/19/EU, has been published in issue L197 of the Official Journal on 24 July 2012. There are several obligations imposed on EVPARTS as a producer of electrical and electronic equipment. EVPARTS's compliance approach for each of these obligations is provided below.

WEEE Marking

All EVPARTS's products that are subject to the WEEE directive shipped from 13th August 2005 are compliant with the WEEE marking requirement. Such products are marked with the "crossed - out wheelie bin" WEEE symbol (shown, right) in accordance with European Standard EN50419.

Customer Information

According to the requirement of the WEEE legislation the following user information is provided to customers for all branded EVPARTS products subject to the WEEE directive.

"The symbol on the product or its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste for recycling, please contact your local authority, or where you purchased your product."

WEEE from Private Households

If any of EVPARTS's branded products are held by private households then any WEEE can be recycled via your local collection facilities. Details of these should be obtained from your local authority

WEEE from users other than Private Households

EVPARTS will ensure the proper recycling of waste resulting from those products arising at the customer's location within the United Kingdom. The costs of recycling are met by EVPARTS. The costs of collecting such waste from customers' premises are not included in EVPARTS's standard offer. However, EVPARTS can provide a chargeable collection service or addresses where customers can return their products. All returns must be issued with a Return Number before customers arrange for delivery of WEEE product.

Changing the world, one coulomb at a time.
